ZOHO CREATOR PLATFORM ENGINEERING

Application Deployment & Migration Report

Application:	Scope:	Target Stack:	Status:
Hotel Booking Management	**Environment Config & Data Migration**	**Multi-Tenant Cloud Infrastructure**	**Deployment Complete**

1. AIM OF THE PROJECT

Primary Objective

To establish a robust deployment pipeline and perform complete data migration for the **Hotel Booking Application** in Zoho Creator. The project aims to configure target environment parameters (Server Name, Port Number, SSL status, and Config Keys), manage migration audit logs, and safely transfer core entity data including Hotel Master records, Guest profiles, Room Types, and Reservation tracking.

$5,791.25	16.00	$750.00	5
Total Booking Revenue	Total Guests Migrated	Average Rate / Night	Hotels Fully Boarded

2. IMPLEMENTATION PROCEDURE

1. **Target Environment Provisioning:** Configured server deployment keys, server hostnames, network port assignments, and SSL security parameters via the Deployment Config module.
2. **Schema & Data Pre-validation:** Staged entity definitions across key forms—Hotels (H001 to H005), Room Types, Guest Profiles, and Reservation structures—ensuring structural integrity prior to migration.
3. **Data Extraction & Migration Execution:** Executed bulk records migration, logging every sequence within the Migration Log module to verify mapping consistency for payment statuses and financial transactions.
4. **Post-Deployment Auditing & Dashboard Validation:** Verified system totals ($5,791.25 overall revenue, 5 total active reservations, 2 completed, 3 pending) and mapped total guests against payment distributions.

3. RESULTS & VISUAL DEPLOYMENT ARTIFACTS

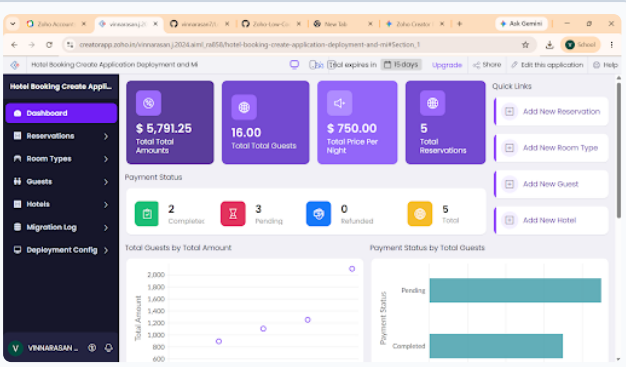

Figure 1: Deployment & Migration Dashboard showing overall guest metrics and payment statuses.

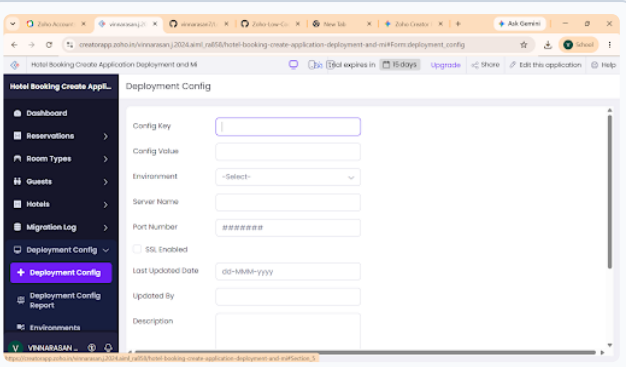

Figure 2: Deployment Configuration module for defining Environment, Server, Port, and SSL parameters.

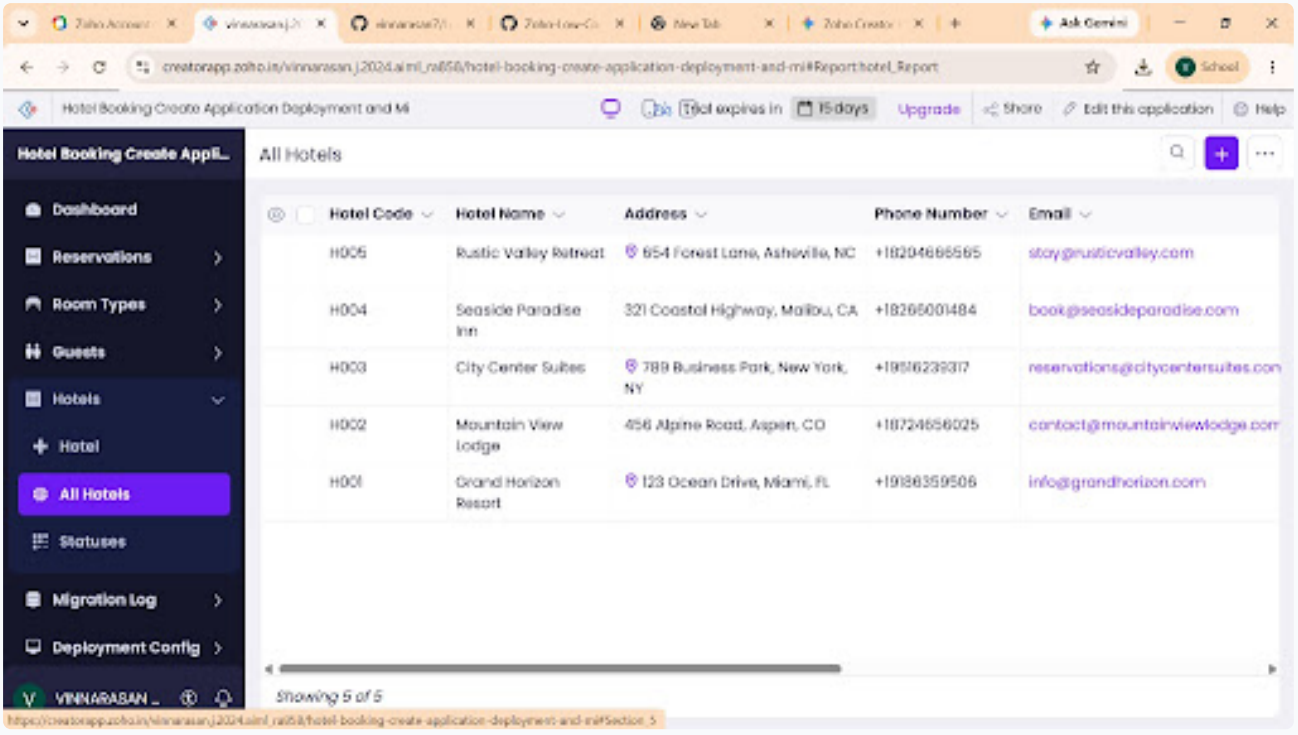

Figure 3: Successfully migrated master records in the All Hotels directory (H001 through H005).

4. MIGRATION & DEPLOYMENT SUMMARY

Module / Component	Configuration / Record Count	Verification Metric	Deployment Status
Deployment Config	Environment Keys, SSL Enabled, Port Assignment	Server handshake & SSL validation	Active / Configured
Hotels Directory	5 Master Records (H001 – H005)	Addresses, contacts & emails verified	100% Migrated
Guest & Reservations	16.00 Guests, 5 Active Reservations	Payment statuses (2 Completed, 3 Pending)	Fully Synchronized
Financial Rollup	$5,791.25 Revenue / $750.00 Nightly Rate	Aggregated dashboard totals verified	Balanced & Audited
